Recognizing the serious threat of bacterial infections, Paratek is dedicated to providing solutions that enable positive outcomes and lead to better patient stories.
Third-party industry and market information included herein has been obtained from sources believed to be reliable, but the accuracy or completeness of such information is not guaranteed by, has not been independently verified by, and should not be construed as a representation by, Paratek. The information contained in this presentation is accurate only as of the date hereof.

This presentation contains forward-looking statements including statements related to our overall strategy, products, prospects, potential and expected results, including statements about the projected net product revenues including assumptions related to our financial guidance, our anticipated cash runway, our SEYSARA royalty-backed loan funded on May 1, 2019, the progressions of our commercial roll out for NUZYRA, our ability to shape the future treatment paradigm for community-acquired bacterial pneumonia and serious skin infections, our plans to evaluate additional indications for NUZYRA, including NTM, and to work toward an oral-only indication in CABP, and our potential to further drive long-term value for all of our shareholders. All statements, other than statements of historical facts, included in this presentation are forward-looking statements, and are identified by words such as "advancing," "expect," "look forward," "anticipate," "continue," and other words and terms of similar meaning. These forward-looking statements are based upon our current expectations and involve substantial risks and uncertainties. We may not actually achieve the plans, carry out the intentions or meet the expectations or projections disclosed in our forward-looking statements and you should not place undue reliance on these forward-looking statements. Our actual results and the timing of events could differ materially from those included in such forward-looking statements as a result of these risks and uncertainties. These and other risk factors are discussed under "Risk Factors" and elsewhere in our Annual Report on Form 10-K for the year ended December 31, 2019 and our other filings with the Securities and Exchange Commission. We expressly disclaim any obligation or undertaking to update or revise any forward-looking statements contained herein.

Paratek is Well-Positioned for Future Growth
Focused on Execution + New Value Creation

**Near-term Execution**

- Advance NUZYRA® U.S. Launch
- Capitalize on Project BioShield Opportunity
- Disciplined Operating Expense Management

**Future Value Creation**

- NUZYRA in Nontuberculous Mycobacteria or “NTM”
- Oral-only dosing regimen for NUZYRA in CABP
- Product / Pipeline Expansion

**NUZYRA® 100mg for injection & 150mg tablets**
Paratek Investment Highlights

NUZYRA®: Potential Blockbuster Antibiotic in Both Hospital and Community Settings

**Potential Blockbuster Antibiotic with NUZYRA®**
- 1st FDA approved and launched once-daily oral & IV antibiotic to treat both CABP and ABSSSI in nearly 20 years*
- > $5 Billion Potential Addressable U.S. Market**

**Capital Efficient Commercial Model**
- Significant Value Proposition = Hospitalization Minimization
- Hospital Promotion with no other Branded Once-Daily Broad-spectrum Oral + IV Competitors

**BARDA Project BioShield**
- BARDA Project BioShield contract awarded for development of NUZYRA for pulmonary anthrax
- Valued up to $285 million

**Additional Pipeline Potential**
- Life-cycle opportunities: Oral-Only CABP, Nontuberculous mycobacteria, Pulmonary Anthrax, Prostatitis, Rickettsial Disease
- Additional Biodefense opportunities beyond pulmonary anthrax

**Strong Balance Sheet**
- Cash runway projected through 2023 with a potential pathway to cash flow breakeven***

(*) NUZYRA U.S. FDA-approved in October 2018
(**) Paratek estimates based on 2015 AMR data current treatment failure rates and a Zyvox 2015 pricing analogue and opportunity reflective of current U.S. label
(***) Assumes estimated NUZYRA US Product revenue, BARDA reimbursement of activities related to Project Bioshield contract. Company will be able to fund all company operating expenses, anticipated capital expenditures, and debt service, including repayment in full of the Hercules Loan and Security Agreement under its existing terms.
BARDA BioShield Contract
A Unique Public-Private Partnership with Paratek

Biothreat agents may be resistant to antibiotics already in Strategic National Stockpile (SNS)

Emerging antibiotic resistance may complicate a response to any public health emergency

Adding to SNS novel antibiotics that overcome resistance enhances national security, serves as additional market
# BARDA BioShield Contract Milestones

A Unique Public-Private Partnership with Paratek Valued at ~$285 million

Zai Lab announced **priority review granted** by NMPA in May 2020

- Seeking approval for the treatment of CABP and ABSSSI

Paratek is entitled to receive:

- **Milestone payment = $6 million** upon regulatory approval (anticipated in the first half of 2021)
- **Tiered royalties at low double digit to mid-teen percentages** on net sales of NUZYRA in the greater China region
SEYSARA: Entered into a License Grant with Almirall for Greater China Region

**Greater China Region:**
- Paratek will earn *high single-digit royalties* on net sales in the greater China region.
- Almirall plans to develop sarecycline for acne in China, with a potential *submission to the China National Medical Products Administration* in 2023.

**Rest of World:**
- Paratek and Almirall also finalized a *license granting Paratek exclusive rights to develop, manufacture and commercialize sarecycline outside the of the U.S.*
- Paratek will share with Almirall any potential revenues of sarecycline outside of the U.S. and greater China region.

NUZYRA®: As First-line Therapy
Targeted Patient Profiles

**CABP**
- Alternative to fluoroquinolone + β-lactam allergic
- Prior C. difficile infection

**ABSSSI**
- Suspected polymicrobial infection + β-lactam / sulfa allergic
- Renal insufficiency + SSRI
U.S. Hospital Skin & Pneumonia Market by 2028
Potential $2.6 Billion Addressable Opportunity for NUZYRA

ABSSSI Opportunity: 1st line treatment (Tx) failure, resistance suspected

- 3,300K Hospitalized ABSSSI
- ~12% (1) Fail broad sp + MRSA cov
- ~400k patients
- $3,000 (3)
- $1.2B opportunity

CABP Opportunity: 1st line Tx failure, resistance suspected

- 3,400K Hospitalized CABP
- ~14% (2) Fail FQ or ceph+macrolide
- ~490k patients
- $3,000 (3)
- $1.4B opportunity

---

(1) AMR data (2015): Of patients never receiving confirmed pathogen and getting potential MRSA coverage, 30%+ switch therapies (i.e., to another empiric therapy)

(2) Primary market research (est 18% of hospitalized CABP patients & 16.5% of community CABP patients are “high-risk” and suspected/confirmed to have a resistant pathogen)

(3) Cost per course based on health outcome analysis, 10 day course of therapy and cost of branded Zyvox therapy as an analogue
U.S. Community Skin and Pneumonia Market by 2028
Potential $2.6 Billion Addressable Opportunity for NUZYRA

**ABSSSI Opportunity: Initial treatment (Tx) failure, resistance suspected**

- 14,400K (1) Community ABSSSI
  - ~5% (1) Fail broad sp + MRSA cov
  - ~735k cases
  - $2,100 (3) per course
  - 1.5B opportunity

**CABP Opportunity: Fluoroquinolone failure, resistance suspected**

- 9,370K (1) Community CABP
  - ~6% (2) Fail fluoroquinolone
  - ~510k cases
  - $2,100 (3) per course
  - 1.1B opportunity

---

(1) 20% est failures (based on hospital patterns) of first line MRSA treatment
(2) Primary market research (est 18% of hospitalized CABP patients & 16.5% of community CABP patients are “high-risk” and suspected/confirmed to have a resistant pathogen)
(3) Cost per course based on health outcome analysis, 7 day course of therapy and cost of branded Zyvox therapy as an analogue

Paratek estimates based on 2015 AMR data current treatment failure rates and a Zyvox 2015 pricing analogue
**Significant Unmet Need in CABP**

**Important Demography:**
- Together with influenza, CABP is currently the eighth leading cause of death in the U.S.\(^2\)
  - All cause 30-day mortality in hospitalized patients exceeds 10%\(^3\)-\(^5\)
- Hospitalization Rates in CABP are increased in older populations and in populations with certain co-morbid conditions, including COPD, CHF, and diabetes\(^6\)

**CABP Pathogens**\(^1\)

- **S. pneumoniae**
- **S. aureus**
- **Enterobacteriaceae**
- **Other**
- **Mycoplasma pneumonia**
- **Legionella pneumophila**
- **H. influenzae**

**References:**
NUZYRA® Opportunities Beyond Current CABP Treatment Options:
Addressing Limited Formulations with Safety Concerns

IDSA/ATS CABP Guideline:¹

Inpatient Rx Non-ICU

- Beta-lactam + Macrolide
- OR
- Respiratory Fluoroquinolone

NUZYRA as First-Line Therapy:
Monotherapy, IV + Oral, when β-lactam/Macrolide or Quinolones are not options

Important Demography:

- Incidence of skin infections requiring hospitalization has substantially increased since the 2000’s.
- ~ 870,000 admissions, 6.3M office visits, and 3.4M emergency department visits annually.
- Underlying co-morbidities including diabetes and vascular disease can complicate management and antibiotic selection.

Common Skin Pathogens:

- MRSA
- MSSA
- Beta-hemolytic Streptococci
- Other Streptococci
- Other Gram positive
- Anaerobe
- Gram negative
NUZYRA® Opportunities Beyond Today’s Skin Treatment Options:
Addressing Limited Formulations with Safety Concerns

IDSA SSTI Guideline:¹

NUZYRA as First-Line Therapy:
Monotherapy, IV + Oral, when Vancomycin/Zyvox +/- Pip/Tazo are not options

SSTI: Skin and Soft Tissue Infection, pip/tazo: piperacillin/tazobactam
Success Begins in the Hospital with Specialists

Institutional Access [“Go-Home” Strategy] and Demand Generation

- ER
- Hospitalists
- Pulmonologists

Formulary/Protocols
Specialty Access & Buying

Demand Generation

Adoption
Focused Launch Targeting Early Adopters

- **Launch in February 2019 with 40 Sales Specialists**
  - In Q3 2019, expanded the sales force size to ~50 representatives; will continue to judiciously add representatives throughout the balance of 2020 toward target of ~60

- **Focusing on ‘Early Adopting’ HCPs in ‘high value’ institutions (~600), will drive institutional access**

- **Inside Sales Team supplements** efforts of Sales Specialists to broaden outreach

---

### Physician Segments

**Early Adopter**
- Focused on broad spectrum and efficacy
- Convenient features with IV to oral transition
- Wait for Early Adopters to trial and use
- Guideline and protocol driven

**Late Adopter**
Ensure Seamless Transition from Hospital to Home
Continuity of Care Providing Access to Oral NUZYRA

**Continuity of Care**
- Prevent gap in care
- Sample / Bridge Program (as needed)

**Distribution Network**
- IV Formulation
  - National & Regional Distributors
- Oral Formulation
  - National & Regional Pharmacies
  - Program allows for oral formulation pick-up at retail locations or home delivery

**Reimbursement Support Services**

**Affordability Program**

**HUB Services**
- Enables effective discharge process
NUZYRA Life-Cycle Opportunity

Non-Tuberculous Mycobacterium Abscessus
**NTM (M. abscessus) Rare Disease Opportunity**

*Potential $740 Million Addressable Market by 2028*

- No approved therapies
- *Triple antibiotic therapy approaches are most common*
  - Most Agents IV only
- Nearly 80% failure rate with existing treatments
- Long treatment duration typically 12-24 months

---

### NTM (M. abscessus) Opportunity with Once Daily Oral Therapy

- **6,300**(1) M. abscessus yearly incidence
- **>75%**(2) Fail triple generic Tx
- **~4,760** patients
- **$155,420**(3) per course
- **$740M** opportunity

---

(2) Am J Respir Crit Care Med Vol 175. pp 367–416, 2007 (“no antibiotic regimens based on in vitro susceptibilities has been shown to produce long-term sputum conversion for patients with M. abscessus lung disease. The goal of 12 months of negative sputum cultures while on therapy may be reasonable, but there is no medication strategy to reliably achieve this goal”)

(3) 135 DOT in initial Tx to clear infection. Assuming success, avg 274 DOT (recommendation for 12mo of Tx after 3 negative cultures; assumes 75% compliance); $380 avg cost/day - blend of IV ($345/DOT) and Oral ($395/DOT)
Nontuberculous mycobacteria or “NTM”

Potential Opportunity with Omadacycline

Prevalence of All NTM

- 70,000 – 80,000 NTM cases in the U.S.
- 5-10% year-over-year increase in prevalence
- 5 year all-cause mortality 40%

Paratek focused on subset of NTM patients (~6,000-8,000) with *Mycobacterium abscessus*
  - Currently, no approved antibiotic therapies

Radiographic Hallmarks

Pulmonary Pharmacokinetics of Omadacycline and Tigecycline

NUZYRA Published Data in Anthrax
Compelling in vitro Activity and in vivo Efficacy

Potent *in vitro* activity

*B. anthracis*
